EDUCATION

Course	College / University	Year	CGPA
B.Tech. in Information Technology (Network & Information Security)	Netaji Subhas University of Technology (NSUT), Delhi, India	Nov 2022 - Jul 2026	8.01/10

EXPERIENCE

Zinnia - Software Developer Intern Jan 2026 - Jul 2026
Noida, India

Java 17, Spring Boot, MongoDB, Next.js, TypeScript, EKS

- **API Gateway & Orchestration:** Designed **REST APIs** and orchestration workflows for **Admin Console**, a client-facing onboarding platform spanning **6+ microservices**, using **Java 17, Spring Boot, MongoDB**, and a **Spring MVC API Gateway**.
- **Configuration & Lifecycle:** Built **dynamic product configuration** and entity lifecycles (draft - review - publish - active), with **multi-stage validation**, **global exception handling**, and consistent API errors.
- **Data Integrity & Auditing:** Designed **MongoDB schemas and indexes**; implemented **atomic updates**, **cross-service consistency checks**, and project-wide **audit logging** for entity and configuration changes.
- **NES Automation:** Built a responsive **Next.js and TypeScript** interface backed by **Spring Boot and MongoDB APIs on EKS**; automated production edits through **GitHub PRs**, reducing issue-resolution time by approximately **70%**.
- **Testing & Logging:** Implemented structured logging with **SLF4J**; added **JUnit** unit and integration tests, **OpenAPI contract validation**, and **Playwright** end-to-end tests.

ARK Simplify - Software Engineer Intern May 2025 - Jun 2025
Gurugram, India

Node.js, Express.js, MongoDB, Razorpay

- **Backend Development:** Developed **REST APIs** for an internal application using **Node.js and MongoDB**; implemented **request validation**, **centralized error handling**, and **role-based authentication**.
- **Payments & Performance:** Integrated **Razorpay** with **server-side verification and webhook handling**; optimized queries using **indexing and pagination**, reducing page-load time by **35%**.

PROJECTS

AI Fitness Tracker Microservices [GitHub](#)

Java, Spring Boot, PostgreSQL, MongoDB, RabbitMQ, Gemini API

- Built **Spring Boot microservices and REST APIs** for user management, workout tracking, activity history, and personalized recommendations.
- Secured requests with **Keycloak OAuth 2.0 and PKCE**; configured **JWT validation**, an **API Gateway**, **Eureka service discovery**, and a centralized **Config Server**.
- Implemented an **event-driven RabbitMQ pipeline** across **MongoDB and PostgreSQL** to generate and persist **Gemini-powered workout analysis**.

Map My Hotel [GitHub](#)

React.js, TypeScript, Node.js, Express.js, MongoDB

- Built a **Node.js, Express.js, and MongoDB** backend with **MVC architecture**, **RESTful CRUD workflows**, and **Multer-based image uploads**.
- Developed responsive hotel discovery and management flows using **React.js and TypeScript**, integrating frontend views with **backend APIs**.
- Implemented **Passport.js authentication**, **salted password hashing**, **protected routes**, **request validation**, and **centralized error handling**.

TECHNICAL SKILLS

Languages: Java

Backend & APIs: Spring Boot, Spring Cloud, REST APIs, Microservices, OpenAPI/Swagger, Node.js, Express.js

Frontend: React.js, Next.js, TypeScript

Databases & Messaging: PostgreSQL, MongoDB, RabbitMQ

Security & Cloud: OAuth 2.0, Keycloak, JWT, Passport.js, AWS, CI/CD

Tools & Fundamentals: Git, GitHub, Maven, JUnit, SLF4J, Playwright, DSA, DBMS, OOP, Operating Systems

ACHIEVEMENTS

- Solved **800+ DSA problems** across **LeetCode**, **GeeksforGeeks**, and **HackerRank**; reached **Codeforces Specialist** with a peak rating of **1446**.
- Won the **ConTecl Hackathon**; **Disease Diagnosis System** advanced to the analytics round of **Smart India Hackathon 2024**.
